

AMENDMENTS TO THE CLAIMS:

This Listing of Claims will replace all prior versions, and listings, of Claims in the Application:

Listing of Claims:

Claim 1 (Currently Amended): A wound disinfecting method, comprising the steps of:

(a) ~~supplying~~ establishing a power to a whole system thereof source for providing electrical power for a turbine fan, a wind tunnel and an ozone generating unit;

(b) supplying a current of air; a pressure of said current of air being increased with a said turbine fan and a said wind tunnel;

(c) multiplying a voltage of said electrical power; the voltage being multiplied to such a degree that an electric discharge ~~similar to discharge of lighting can happen for~~ is generated, allowing an said ozone generating unit ~~to generate~~ generating ozone of high concentration;

(d) eliminating electromagnetic interference so as to eliminate interference of static electricity of electromagnetic waves;

(e) blowing the ozone of step (c) out by means of said turbine fan and other auxiliary fans; and,

(f) disinfecting a wound; the ozone being passed over the wound for destroying bacteria therein and therearound.

Claim 2 (Previously Presented): The wound disinfecting method as claimed in Claim 1, wherein step (c) further includes supplying ultraviolet rays by means of an ultraviolet ray generating unit for disinfecting the wound; an isolation treatment being done on said whole system for protecting a user from said ultraviolet rays.

Claim 3 (Previously Presented): The wound disinfecting method as claimed in Claim 1, wherein step (c) further includes supplying anions by means of an anion generating unit for disinfecting the wound.

Claims 4-13 (canceled).
